PERFECT SIZE

the perfect size is often associated with a balance between functionality, aesthetics, and practicality. It is the size that best fulfills the intended purpose or achieves the desired outcome. Whether it's a product, a room, or an object, the perfect size should offer optimal usability, comfort, and efficiency. It takes into account factors such as proportion, scale, and the specific needs of the user or space.

दर्पण Darpan / Mirror

In relation to tiles, the term "Darpan" could be interpreted metaphorically to describe tiles with reflective or glossy surfaces. These tiles have a smooth finish that reflects light and creates a mirror-like effect, adding depth and luminosity to the space.
